EDUCATION

Texas A&M University, Engineering Honors

College Station, TX

B.S. Computer Science, Applied Mathematics.

May 2027

- Relevant Coursework: Data Structures & Algorithms, Computer Organization, Real Analysis.
- Awards: National Merit Winner, Texas A&M President's Endowed Scholar, Dean's Honor Roll.

EXPERIENCE

Dryft | Neo, General Catalyst

May 2026 – Present

Founding Engineer

San Francisco, CA

- Developed agents with Python and **PydanticAI** to reason over live ERP data, coordinate supplier follow-ups, and generate SAP updates for approval.
- Owned data pipelines end to end for **billion-dollar manufacturers**, using **Dagster** and **PostgreSQL** for SAP ingestion, incremental sync, and reconciliation.
- Built **autonomous QA** workflows with **Temporal** to investigate data and business-logic regressions; instrumented agent execution with **PostHog**.

SISO Engineering

May 2025 – August 2025

Backend Engineer

Houston, TX

- Cut query runtimes **by 73%** on **300 million** rows and improved real-time streaming scalability across **40+** international edge devices.
- Protected **1.7 million** streaming records through preventative data validation.
- Built Terraform infrastructure to provision Grafana workspaces and Azure database resources.

Texas A&M Department of Computer Science

August 2025 – Present

Undergraduate Teaching Assistant

College Station, TX

- Developed critical plagiarism software as a part of the plagiarism subteam to verify **600+** student submissions using C++ fingerprinting algorithms and AI detection software.

tidalhacks

October 2025 – Present

Logistics Director

College Station, TX

- Spearheaded one of Texas A&M's largest student-run hackathons, overseeing end-to-end logistics and securing sponsorships/venue support for **300+** hackers, sponsors, and mentors.
- Designed and deployed the tidalhacks 2025 live site and custom judging platform, enabling real-time scheduling, announcements, and project evaluation across dozens of concurrent submissions.
- Coordinated sponsor-led workshops, technical talks, and mentorship blocks while directing judges and volunteers with clear run-of-show instructions to keep a 24-hour event running smoothly.

PROJECTS

Kernel Optimization | Python, FastAPI, PostgreSQL, Modal

September 2026

- Co-developed an H100 benchmarking platform for LLM inference optimization, with automated submissions and throughput rankings gated on output correctness.
- Expanded dispatch to support **50 GPU workers** and removed queue deadlocks that stalled concurrent job claims.
- Added static submission checks before GPU allocation to avoid spending compute on invalid jobs.

Fold Forge AI | TypeScript, Tailwind CSS, Google Gemini, MCP Servers

November 2025

- Placed **top 5 at HackUTD 2025**; built a 10-second drug discovery analysis workflow using tool-calling agents for molecular structures and protein-ligand interactions.
- Ranked **3 million** research papers to surface **20** relevant studies in a single pass.

TECHNICAL SKILLS

Web Development: React, Next.js, Vite, Django, Express, Sockets, Tailwind CSS, Chakra UI, TanStack Query

Backend & Data: FastAPI, PydanticAI, Temporal, Dagster, PostgreSQL, Redis, SQLAlchemy, Polars, SAP OData

Cloud & Infrastructure: Azure Container Apps, Modal, Terraform, Docker, Arch Linux, Blacksmith

Observability & Analytics: PostHog, Grafana, KQL, ADX, Power BI
